

# Calculate rates, prepare returns, manage exemption certificates, and more

Directly from Sage

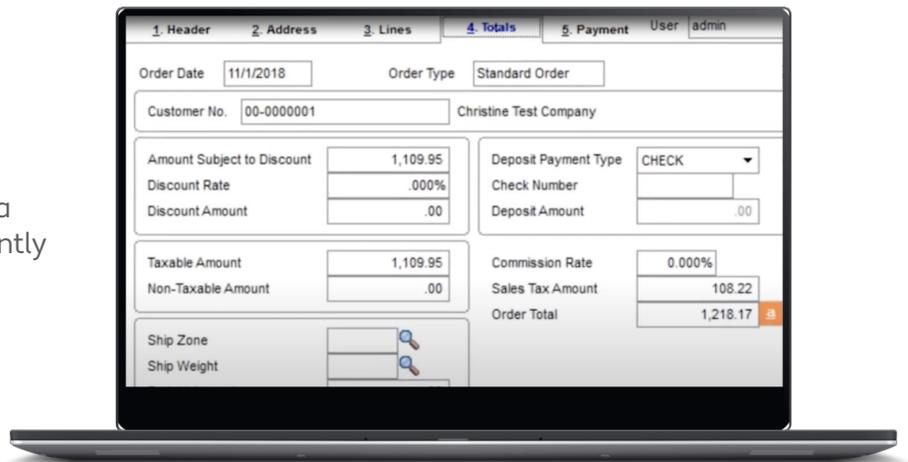

Trying to keep up with all the demands of sales and use tax compliance can feel like a balancing act, especially given how frequently tax rates and taxability rules change.

Powered by Avalara, the Sage Sales Tax suite of cloud-based tax solutions gives you a better way to improve your tax compliance management.

Offload the complexity of tax compliance from end to end. Sage Sales Tax integrations are already built into the following systems:

- Sage 50cloud (U.S. edition)
- Sage 100
- Sage 300
- Sage 500 ERP
- Sage X3
- Sage BusinessWorks

## Know where to register

Sage Sales Tax tracks your economic nexus tax liabilities and will alert you when you're about to trigger tax obligations in new states.

## Manage certificates

Tax is automatically omitted from exempt sales. Sage Sales Tax allows you to manage exemption certificate collection, storage, and renewals within Sage.

## Calculate real-time rates

Sage Sales Tax calculates rates across 12,000+ U.S. tax jurisdictions and verifies addresses with more accuracy than when relying on ZIP codes.

## File and remit returns

Reconcile a single worksheet and pay one amount for your total tax liability. Sage Sales Tax works with state and local governments to file and pay on your behalf.

## Assess consumer use liability

Avoid complicated spreadsheets or expensive custom solutions. Sage Sales Tax allows you to assess consumer use tax liability across your business.

## Handle global commerce

Sage Sales Tax calculates customs duty and import taxes such as VAT and GST for your international shipments.

#### WHAT CUSTOMERS ARE SAYING:

More than 1,100 Sage customers depend on Avalara to do tax compliance right.

*"Everything's kept track of for us and we don't have that extra work at the end of every month to file all of our returns, we just have to check what's in the system."*
